PROJECTS

Personal Portfolio ‖ https://portfoliodash.vercel.app/   **jan 2024**

Developed a personal portfolio with an integrated dashboard using the MERN stack (MongoDB, Express.js, React, Node.js).

Implemented CRUD operations for managing projects and skills, ensuring seamless user interactions.

Secured the dashboard with JWT-based authentication and route protection, restricting access to CRUD operations.

Netflix-Clone | https://mern-netflix-clone-lp9d.onrender.com/   **june 2024**

Developed a fully functional Netflix clone using React, Tailwind CSS, Node.js, and MongoDB Compass,

Integrated the TMDB API to fetch and display real-time movie and TV show data with dynamic categorization.

Implemented user authentication with secure login and registration, enhancing user data protection.

Designed a dynamic homepage with categorized movie listings, providing an intuitive content discovery experience

Studdy-Buddy-Web-App | https://github.com/aamidshah/StudyBuddy-webapp   **Dec 2023**

Developed a Study Buddy web application using Django, HTML, and CSS, enabling students to collaborate effectively.

Implemented discussion management, real-time chat, and commenting features to foster interactive learning.

Designed a secure user authentication system, ensuring data privacy and personalized user experiences.

Optimized the backend with Django, providing efficient data handling and smooth real-time interactions.

Additionally, developed several frontend projects including a personal portfolio website, an advanced filtering system based on color categories, and an event handler for interactive UI elements. These projects helped hone skills in responsive design, JavaScript event handling, and user interface development.
