PROJECTS

Hospital Management System   **jan 2024**
Designed and developed a Hospital Management System web application using React.js, Node.js, and MongoDB. The application includes features like patient registration, appointment scheduling, staff management, and real-time data updates. Ensured a user-friendly interface with efficient backend APIs for seamless communication between the client and server.

Netflix-Clone | https://mern-netflix-clone-lp9d.onrender.com/   **june 2024**
Full Stack Netflix Clone
Developed a fully functional Netflix clone using React, Tailwind CSS, Node.js, and MongoDB Compass, integrated with the TMDB API for fetching movie and TV show data. The app features user authentication, a dynamic homepage with categorized movie listings, and seamless playback functionality. Implemented a responsive design for optimal user experience across devices and successfully deployed the project.

Studdy-Buddy-Web-App| | https://github.com/aamidshah/StudyBuddy-webapp   **Dec 2023**
Full stack web app
Developed a Study Buddy web application using Django, HTML, and CSS, offering discussion management, real-time chat, and commenting features to foster collaborative learning.Implemented secure user authentication and efficient backend solutions, ensuring smooth real-time interactions and data handling.

Additionally, developed several frontend projects including a personal portfolio website, an advanced filtering system based on color categories, and an event handler for interactive UI elements. These projects helped hone skills in responsive design, JavaScript event handling, and user interface development.
